Work Experience

Self-Employed

Freelance Web Developer

May 2022 - current | Remote

- Engineered scalable, responsive, multi-platform and SEO friendly websites for multiple clients using HTML5, CSS3 + BEM, JavaScript ES6+ and React best practises
- Included SEO, responsive, multi-platform and hosting support, enabling their website to be used by any browser or device.
- Improved website performance by compression, caching and lazy loading images and components.

Frontend Simplified

Front End Developer Support

September 2022 - current | Remote

- Supported 1,000+ students using HTML, CSS, Flexbox, JavaScript and React best practices
- Utilized debugging best practices using Google Chrome inspect element tooling.
- Simplified difficult programming concepts including responsive website development, CSS layout, Promises and API requests.
- Built Scalable Landing pages, and websites using advanced languages and practices

Frontend Simplified

Fronend Developer Intern

July 2022 - December 2022 | Remote

- Transformed a completely static HTML, CSS, JavaScript and React single page application into an interactive user interface using animations, transitions and carousels.
 - Utilized Git version control and the GitHub interface to work and thrive in a collaborative team environment
 - Replicated UI & UX designs and reviewed code through weekly code reviews
 - Processed API requests to dynamically represent data from a cloud server and represented it through skeleton loading states, pagination and dynamic routing
-

Projects

Weather API Application

I built a **React JS** weather app using the **OpenWeatherMap API**. I also used axios to connect with the API. Includes search engine and Weather API integration to enable users can search for any city in the world and receive accurate weather and forecasts.

Restaurant Food Website

I made a responsive food restaurant website using **HTML CSS** and **JavaScript**, I also included a pizza loading animation with a fadeout effect using JavaScript and also made a navbar with toggle menu bar effect.

Snake Game

This project is a simple snake game I created using **JavaScript** as well as **HTML** and **CSS** to style the icons, this is a game that loops and also displays best practices for game development and breaking up large files.

Educational Course Website

Created a multi page online educational website using **HTML CSS** and **Vanilla JavaScript** from scratch. This is a responsive website with a navbar with toggle menu bar effect and also using flexbox throughout the whole website to make it responsive on different devices.

Halloween E-Commerce Website

This is a Halloween E Commerce store I created with HTML CSS and Vanilla JavaScript, features of this website include a responsive header and navbar with a toggle effect and also a responsive slider effect using swiper.js.

Starbucks Landing Page

This project is Starbucks Landing Page I made using HTML, CSS and JavaScript, I added a feature that allows the user to select the drink they want and it will appear as a bigger image on the right hand side.

Modern Banking App Website

Created a modern banking website using best practices of HTML, CSS, JavaScript, TypeScript, React, and also TailwindCSS, this is also a responsive website so that it can be viewed on all devices.

Skills

- HTML
 - CSS
 - JavaScript
 - VanillaJS
 - React
 - APIs
 - TypeScript
 - Git
 - TailwindCSS
-
